LABELS

Everyone who grows bulbs under name will want labels. There are many different kinds on the market but think the best cheap label is a painted wooden one. However, in using the wooden labels they really should have a coat of varnish after the name is written, otherwise the paint will weather off taking the name with it. 12 x 1½, 25 for 80 cents, 100 for \$2.75.

IDENTIFICATION OF GLADIOLUS

Do not send a single bloom inside a letter. Then the letter goes thru the stamping machine at the post office all the moisture in the bloom is pressed out on the writing in the letter and is so blurred one can not make out its meaning and the crushed bloom so damaged it can not be identified. Just send a part of the stem with 3 or 4 buds on and leave enough stem for us to place in water for the bud to open. Do not send the very tip of the spike and do not put any wet paper or anything moist whatever in the package.

Our planting time here is around APRIL to JUNE, so when ordering your bulbs to be sent to you at planting time, please state when planting time is in your locality. It will help us a lot.

Of course glads grow older each year, you dig a new bulb not a young one. So it is best to keep adding more bulbs to your collection each year.

We have been asked this question inndrates of times. So many warheltes divide or split, suppose you plant twelve mixed buils, when you dig them you find you have about odd; than others. Many varieties do not divide, so you divide not only one meet only one meet only one or one of the some of the control o GLADIOLUS do NOT Change Color.

Again, Thank You, MABEL M. ROWE, Prop.

There were hundreds of visitors looking over the field this past season and as always they are always welcome.

As usual I have discarded some of the good bldies and have added several newer kinds. We had enough rain during the growing season to make fine, clean, plump bulbs and did harvest a fine crop, mostly on new ground.

It is a great pleasure to again express my contributed appearance of the same during a same quality of worthwhile varieties.
